

# Datacard® Visitor Pointe™ Solution

*The Visitor Pointe solution can save time, streamline registration, minimize errors and reduce the cost of your visitor ID program.*

## **Fast and effective visitor check-in**

The Datacard® Visitor Pointe™ solution allows you to enroll visitors with ease, using a driver's license, passport or other government-issued identification. Quick and cost-effective, the Visitor Pointe Solution scans official credentials to produce a secure guest ID card in just seconds. The software creates a database of visitor photos, making production of repeat visitor IDs a short and simple process. The Visitor Pointe solution is ideal for government agencies, schools, corporations or any organization that experiences frequent guest visits.

## **A reliable and flexible solution**

- Pre-register visitor names for faster and more efficient enrollment of large groups. Complete the process by simply scanning each visitor's credential upon arrival.
- Create a detailed log of visitor activity by scanning cards at check-in and check-out.
- Download new government-issued identification templates over the Web as soon as they are available.

# Datacard® Visitor Pointe™ Solution

Departing visitors can swipe their ID card at a security workstation or have the security staff complete the check-out process by simply scanning their visitor badge.

## Standard features

- Seamless data capture from government-issued ID cards or passports
- Automated check-in/check-out visitor management process
- Real-time access to reports and audit capabilities
- Multiple-use badges for frequent visitors
- Automatic alerts for scheduled visit dates, visitor expiration date/time and visitor badge expiration date/time
- Visitor history tracking
- Web updates for new government-issued identification templates
- Visitor pre-registration
- Define valid date and time for each visitor (optional)
- Automatically detect the type of government ID scanned
